

Write code in HTML to produce following result—

This is the head of the table			
Cell 1	Cell 2	Cell 3	Cell 4
This is the foot of the table			

Try it yourself first.

If unable to solve, then refer the following solution:

```
<!DOCTYPE html>
<html>

  <head>
    <title>HTML Table</title>
  </head>

  <body>
    <table border = "1" width = "100%">
      <thead>
        <tr>
          <td colspan = "4">This is the head of the table</td>
        </tr>
      </thead>

      <tfoot>
        <tr>
          <td colspan = "4">This is the foot of the table</td>
        </tr>
      </tfoot>

      <tbody>
        <tr>
          <td>Cell 1</td>
          <td>Cell 2</td>
          <td>Cell 3</td>
          <td>Cell 4</td>
        </tr>
      </tbody>

    </table>
  </body>
</html>
```

Description:

Table Header, Body, and Footer

Tables can be divided into three portions – a header, a body, and a foot. The head and foot are rather similar to headers and footers in a word-processed document that remain the same for every page, while the body is the main content holder of the table.

The three elements for separating the head, body, and foot of a table are –

- **<thead>** – to create a separate table header.
- **<tbody>** – to indicate the main body of the table.
- **<tfoot>** – to create a separate table footer.

A table may contain several `<tbody>` elements to indicate *different pages* or groups of data. But it is notable that `<thead>` and `<tfoot>` tags should appear before `<tbody>/`
