

Student Marksheet program

Open phpMyAdmin.

Part 1:

- Create a database (here students)
- Create a table (here student)
- Create 5 column(here Roll_no, Name,sub1,sub2,sub3)

Part 2: Create a php file with following code:

Student.php

```
<html>
```

```
<head>
```

```
<title>Student marksheet</title>
```

```
</head>
```

```
<body>
```

```
  <form method="post" action="" >
```

```
    <table border="1" >
```

```
      <tr>
```

```
        <td><label for="Roll_no">Roll Number</label></td>
```

```
        <td><input type="text"
```

```
          name="rno" id="Roll_no"></td>
```

```
      </tr>
```

```
</tr>
```

```
  <td><input type="submit" name="submit" value="Submit"/>
```

```
        <td><input type="reset" value="Reset"/>
    </tr>
</table>
</form>
```

```
<?php
if(isset($_POST["submit"]))
{
    $id= trim($_POST["rno"]);
    $cn=mysqli_connect("localhost:3307","root","");
    // Select the database to use
    mysqli_select_db($cn,"students");
    $query = "SELECT * FROM `student` WHERE `Roll no` =". $id. " ";
    $result = mysqli_query($cn,$query) or die(mysqli_error($cn));
    //Execute the query
    While($row=mysqli_fetch_array($result))
    {
        echo "Roll No:<input type=\"text\" value=\".$row['Roll no'].\"><br>";
        echo "Name:<input type=\"text\" value=\".$row['Name'].\"><br>";
        echo "S1:<input type=\"text\" value=\".$row['sub1'].\"><br>";
        echo "S2:<input type=\"text\" value=\".$row['sub2'].\"><br>";
        echo "S3:<input type=\"text\" value=\".$row['sub3'].\"><br>";
        $x=$row['sub1']+$row['sub2']+$row['sub3'];
        If($x>200)
        echo "Grade:<input type=\"text\" value=Good><br>";
```

```
else
echo "Grade:<input type=\"text\" value=Poor><br>";
}
}
?>
</body>
</html>
```
